

With great pleasure we announce the Fourth Meeting of the Croatian Association for Cancer Research (Hrvatsko društvo za istraživanje raka, HDIR), a member of the European Association for Cancer Research (EACR).

HDIR-4 Meeting will continue with the "From Bench to Clinic" approach, divided into five major cancer research topics:

- Tumor Biology and Evolution
- Signaling Networks in Cancer
- Cancer Genetics and Epigenetics
- Cancer Immunology and Diagnostics
- Targeted Therapies and Drug Resistance.

The goal of the HDIR-4 Meeting is to promote cancer research in Croatia focused on the cooperation between basic research and clinical cancer management. This meeting will put an emphasis on international communication and cooperation, with speakers from many European countries. The Meeting is the opportunity for cancer researchers and clinicians to gather together and to establish a good working relationship with each other and with other regional EACR national societies.

Original contributions by clinicians and researchers with an interest in cancer are more than welcome and encouraged. Your contribution to this meeting will mutually benefit all participants and help to make this event successful.

We invite you to join us, and we are looking forward to meet you in Zagreb.

Sincerely,

Sonja Levanat, PhD  
HDIR President
